Large magnetic reed KY-025 FOR

Use the magnetic module and the digital interface with 13 LED to build a simple circuit, making magnetic field indicating lights.

Use the LED built in the digital interface13 to connect the magnetic sensor to digital interface 3. When the magnetic sensor senses a button signal, the LED is on; otherwise, it will be off

Sample Code:

Int Led=13; / / define LED interface

Int buttonpin=3; / / define magnetic sensor interface

Int Val; / / define digital variable val

Void Setup ( )
